

SHANI'S FARM **MEAT SHARES**

About Us

This is our 8th year as an all-natural family farm, with several years' experience.

We have owned our farm for 12 years; we have always loved animals, taking care of our way to live and environment by consuming natural healthy products.

Our belief is to help promote a better way of life on and around the farm by natural growth for all our livestock, and gardens.

The food we eat should not have to travel for thousands of miles for us to consume, we need to reduce our reliance on foreign produced foods. Most of what we pay for food that is shipped is for transportation. The flavor is lost in the aging, packaging and preservatives that are added to keep the product looking fresh.

Our products are fresh: no chemicals added for pest or weed controls, on our pastures or hay.

Shani's Farm offers free range poultry (chicken, duck, and turkey), pork, lamb and Beef.

We raise heritage breed animals, Berkshire swine, Kathadine sheep, along with cross bred meat sheep, various heritage poultry. All fed chemical free feed along with our pasture grasses, hay.

What is a CSA?

Community Shared Agriculture is a way for farmers and consumers to connect through the weekly or Monthly, delivery of fresh, food baskets by the farmer directly to the consumer.

By paying for their products at the beginning of the season, shareholders help provide the farmer with the initial capital to purchase or raise the appropriate supply for their members

By enjoying the CSA you help support your local farmer, help preserve and enrich farmland and reduce our ecological footprint on the earth.

What is a share?

A CSA share with Shani's Farm is a monthly box of All Natural meats raised on our farm.

Farm Fresh Meats
